Summary

I am a Software Developer currently pursuing a Master of Data Science at Monash University. Adept at Jupyter Notebook and Python, with hands-on experience in key libraries (NumPy, Pandas, scikit-learn) and actively expanding my toolkit by learning Tableau and R. I embrace the core qualities of a data scientist—analytical thinking, curiosity, and collaboration—and apply them daily by developing robust data pipelines, exploring complex datasets, and sharing insights with cross-functional teams.

Education

MONASH UNIVERSITY
Masters of Data Science

Melb, Australia
Currently perusing

SAVITRIBAI PHULE PUNE UNIVERSITY
Bachlors of computer science
Project: Recreating historical figures in a virtual environment using Unreal and AI

Pune, India
Jan 2024

MAHARASTRA BOARD OF SECONDARY EDUCATION

Nashik, India

Work Experience

ERTH electric Pvt. Ltm
Assistant Manager

Nashik, India
June 2023 to March 2024

- My primary responsibility was managing content creation and video editing. I constantly went above and beyond. I played a pivotal role in a successful website launched by leveraging Mark Strong, Computer Science Engineering background. I simultaneously contributed to the development of our mobile application, demonstrating my ability in technical areas.
- Creation of engagement content for the website and social media platforms. Also provided video editing skills for creating better content for the website
- I also helped with the launch of the website using my html, as well as CSS skills, and making sure the backend is compatible with the frontend.
- I was the project manager of mobile app development and my understanding of computer science principles and willingness to learn new technologies help me understand and develop an app for the team

Mylan Laboratories

Nashik, India

Worked on Project

May 2022 to July 2022

- Worked on a Data Science project with the team at Mylan Laboratories.
- Worked on driving and creating a Dashboard for the production line
- Getting insights on how to manage the system more efficiently.
- Helped me understand team work and working in teams as well as a company.

Certification

Learning Python for Data Analysis and Visualization

June 2022

- Use the Jupyter Notebook Environment.
- Use the NumPy library to create and manipulate arrays.
- Use the panda's module with Python to create and structure data.

Complete Blender Creator: Learn 3D Modelling for Beginners

February 2024

- Use Blender and understand it's interface
- Understand the principles of modelling
- Create 3D models with simple colours
- Create animations for your objects & characters

Unreal Engine 5 C++ Developer: Learn C++ & Make Video Games

February 2024

- C++, the games industry standard language.
- Object Oriented Programming
- Artificial Intelligence behaviour programming for enemies.
- Write code that is clean and to understand.
- When to use Blueprint or C++.
- Unreal Gameplay Framework to make games easily.
- Strong and transferable problem-solving skills.

Volunteering

Swapnapurti Foundation

- This is a nonprofit organization created by my college to help underprivileged and impoverished parts of society
- I have participated in a number of events such as cleaning out cleaning the banks of the river in a huge team after the Ganpati Festival.
- As a part of this organization, we were also able to go to schools in remote villages and help the students learn a bit more about technology and different activities world while in School.

Skills & Interests

Soft Skills: Communication, problem solving, teamwork, adaptability, time management, critical thinking, leadership, emotional intelligence, contract resolution, creativity and networking

Technical: MS Office, Project management, Python, C, video editing, premiere pro, final cut, C++, Java, unreal engine, blender and tableau

Language: English, Hindi, Marathi

Personal Interests: Driving, basketball, badminton, swimming, video editing and gaming
