

ATHARVA JITENDRA KHAIRE

Data Scientist | Data Analyst | Data Engineer

Melbourne, VIC, Australia | +61 468 948 068 | atharvakhaire64@gmail.com

Portfolio: <https://deepsix-pi.vercel.app> | LinkedIn: <https://www.linkedin.com/in/atharva-khaire-497119156>

GitHub: <https://github.com/beastlyluck>

PROFESSIONAL SUMMARY

Master of Data Science candidate at Monash University with a Bachelor of Engineering (B.E.) in Computer Science. Seeking a Data Scientist, Data Analyst, or Data Engineer role in Melbourne. Builds end-to-end data analytics: data cleaning, data wrangling, SQL, statistical analysis, machine learning, predictive modelling, time series forecasting, A/B testing, causal inference, Extract Transform Load (ETL) data pipelines, and business intelligence dashboards. Portfolio of six digital twins and 22 analytics case studies using Python, Pandas, NumPy, scikit-learn, PySpark, PyTorch, Jupyter, Microsoft Excel, Tableau, Microsoft Power BI, FastAPI, Docker, and AWS. Strong problem solving, stakeholder communication, teamwork, and KPI reporting. Focused on data quality, feature engineering, cross-validation, model evaluation, SHAP explainability, and insights stakeholders can audit.

SKILLS

Core competencies: Data Science, Data Analysis, Data Analytics, Data Engineering, Machine Learning, Deep Learning, Statistical Analysis, Predictive Modelling, Data Mining, Business Intelligence, Reporting, Big Data, Cloud

Programming: Python, SQL, R, Java, C++, JavaScript, TypeScript, Linux, Git, GitHub, CI/CD (GitHub Actions), Jupyter

Data analysis: Pandas, NumPy, data wrangling, data cleaning, exploratory data analysis (EDA), data modelling / data modeling, statistics, hypothesis testing, A/B testing, causal inference, time series forecasting, feature engineering, model evaluation, cross-validation, data quality, Microsoft Excel

Machine learning: scikit-learn, XGBoost, LightGBM, Random Forest, supervised learning, classification, regression, clustering, anomaly detection, SHAP, model monitoring, PyTorch, computer vision, Natural Language Processing (NLP)

Data engineering: Extract, Transform, Load (ETL), data pipelines, Apache Spark / PySpark, dbt, Great Expectations, Parquet, PostgreSQL, FastAPI, REST APIs, Docker, Kubernetes, AWS, Kafka

Visualization and BI: Tableau, Microsoft Power BI, Plotly, Matplotlib, ggplot2, Streamlit, dashboard design, Key Performance Indicator (KPI) reporting, GeoPandas

Collaboration: Agile delivery, stakeholder communication, teamwork, project management, documentation, code review

EDUCATION

Master of Data Science - Monash University

2024 - 2026

Clayton, Melbourne, Australia | Coursework complete; FIT5122 and FIT5120 in progress

- Core study: Python, SQL and databases, data wrangling, statistical modelling, machine learning, Apache Spark / PySpark (big data), Tableau and data visualisation, deep learning (PyTorch), cloud computing and security (AWS, Docker, Kubernetes), project management, IT research methods.
- Industry experience studio project (FIT5120) and professional practice (FIT5122) in progress. Agile delivery, stakeholder communication, and teamwork with an external client.

Bachelor of Engineering (B.E.), Computer Science - Savitribai Phule Pune University

Graduated Jan 2024

Pune, India | Bachelor of Engineering in Computer Science

- Four-year Bachelor of Engineering (Computer Science): programming, data structures, algorithms, databases, software engineering, and computer networks.
- Capstone: virtual-environment reconstruction of historical figures using Unreal Engine 5, C++, and AI behaviour systems.

PROJECTS

Portfolio website: <https://deepsix-pi.vercel.app> | GitHub: <https://github.com/beastlyluck>

AeroTwin | Data Scientist | Python, PyTorch, machine learning

- Built a digital twin that trains a drone control policy in simulation and measures the sim-to-real gap on held-out wind. Six airframes, 400 Hz loop, cross-validation across seeds. github.com/beastlyluck/aerotwin

GridPulse | Data Analyst / Data Engineer | Python, SQL, optimization

- Built a 48-bus energy twin: power-flow analytics, physics-informed ratings, and LP dispatch dashboards so one overloaded line does not cascade. github.com/beastlyluck/gridpulse

BioSync | Data Scientist | Python, NumPy, Streamlit

- Wearable analytics twin for glucose and heart rate. Data cleaning under missing sensors, predictive ODE modelling, Jupyter/Streamlit reporting, privacy-preserving cohort export. github.com/beastlyluck/biosync

OceanicOS | Data Engineer | Python, FastAPI, forecasting

- Discrete-event logistics twin: 2 berths, 16 AGVs, assignment optimization, 48-hour policy comparison, and hierarchical time series forecasts. REST API replay. github.com/beastlyluck/oceanicos

ForgeX | Data Scientist | Python, scikit-learn, computer vision

- Manufacturing cell twin: data mining on acoustics, current, and vision. Random Forest / IsolationForest plus logistic

classification, model evaluation on a later shift. github.com/beastlyluck/forgex

TerraTwin | Data Scientist | Python, Docker, Kubernetes, cloud

- Agriculture climate twin: predictive control vs PID, spatial data analysis, Docker/Kubernetes deployment. github.com/beastlyluck/terratwin

Campus load forecast and model monitoring | Python, LightGBM, time series

- Forecasting and data analytics for hourly electricity demand across 12 buildings. LightGBM + residual model, rolling-origin evaluation, 24-hour MAPE 6.8%. Drift monitoring so a winter model cannot fail silently.

Nightly analytics fabric and score API | Data Engineer | ETL, dbt, FastAPI, XGBoost, SHAP

- Extract, Transform, Load (ETL) data pipeline: 27 models, 42 data quality tests, 18-minute nightly SLA. Credit-style machine learning API: 12 features, AUC 0.86, p95 11 ms, SHAP reason codes, canary rollback.

Causal inference, forecasting, and BI cases | Python, R, SQL, Tableau, Power BI

- A/B-style uplift (Qini 0.19, 34% budget saved). Synthetic control ATT -6.4%. SKU forecast hierarchy WRMSSE 0.62 on 12k SKUs. Ward occupancy MAE 4.2 beds. Tableau / Power BI KPI dashboards.

Computer vision, graph analytics, and operations reporting | PyTorch, YOLOv8, NetworkX

- Land-use classification 97.4% accuracy. Inspection KPI board: mAP 0.69, PPM -18%. Fraud-ring case packs: PR-AUC 0.64, review time -31%. ED wait, rent-stress, and invoice-leak reporting boards.

WORK EXPERIENCE

Assistant Manager - EARTH Electric Pvt. Ltd.

June 2023 - March 2024

Nashik, India | Full-time | Web delivery, reporting, and project management

- Led website launch and content pipeline using HTML, CSS, JavaScript; coordinated stakeholders and Agile-style delivery.
- Project-managed mobile application delivery, backend-frontend compatibility checks, and progress reporting to managers.
- Used problem solving and communication to keep web, video, and social reporting on schedule.

Data Science Project Contributor - Mylan Laboratories

May 2022 - July 2022

Nashik, India | Manufacturing analytics | Python, Pandas, dashboards

- Built a production-line dashboard for manufacturing insights using Python, Pandas, Microsoft Excel, and data visualization.
- Performed data cleaning, exploratory data analysis, and KPI reporting on system efficiency metrics.
- Presented data-driven findings to a cross-functional team; supported data-driven decision making on the line.

Volunteer - Swapnapurti Foundation

2020 - 2024

Nashik, India | Community outreach | Leadership, communication, teamwork

- Delivered technology workshops for students in remote village schools; organised community outreach events.

CERTIFICATIONS

- Learning Python for Data Analysis and Visualization - Udemy (June 2022) | Jupyter, NumPy, Pandas, Matplotlib, data visualization
- Complete Blender Creator: 3D Modelling for Beginners - Udemy (February 2024)
- Unreal Engine 5 C++ Developer - Udemy (February 2024)

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi. Open to Data Scientist, Data Analyst, and Data Engineer roles in Melbourne. Bachelor of Engineering (Computer Science) plus Master of Data Science.
